CSE 326 System Analysis and Design Laboratory
Laboratory 5

1. Composition: Convert the following class diagram into java code. Test the Customer and Admin class in GeneralizationTest.java (This class has main method).

```
                    ┌─────────────────────────────────┐
                    │              User               │
                    ├─────────────────────────────────┤
                    │ -userid: String                 │
                    │ -password: String               │
                    ├─────────────────────────────────┤
                    │ +getUserId()                    │
                    │ +getPassword()                  │
                    │ +setUserId(userId:String)       │
                    │ +setPassword(password:String)   │
                    └─────────────────────────────────┘
```

Customer	Admin
-name: String	-name: String
-Address: String	
+getname(): String	+setName(name:String): void
+setName(name:String)	+getName(): String
